GENERAL INFORMATION:
APPLICANT: Sabb, Julie D.
TITLE OF INVENTION: SPHINGOSINE-1-PHOSPHATE LYASE POLYPEPTIDES,
TITLE OF INVENTION: METHODS OF USE THEREFOR
TITLE OF INVENTION: METHODS OF USE THEREFOR
FILE REFERENCE: 200116.402c1
CURRENT APPLICATION NUMBER: US/09/356,643B
CURRENT APPLICATION NUMBER: US/09/356,643B
CURRENT FILING DATE: 199-07-19
NUMBER OF SEQ ID NOS: 14
SOFTWARE: FastSEQ for Windows Version 4.0
SEQ ID NO 9
1467
                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Query Match 71.3%;

No. is the number of results predicted by chance to have score greater than or equal to the score of the result being part and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            DB DB
